 - a. There will be an adaptation of your: account, setup, hosting, data, server size as well as maintenance and updates.
 - b. Degressivity on the number of licenses of MISSIONS-Manager, it will be applied the same mechanism as for the ISQM-Manager.

ADVANTAGES:

- Several mission templates are already integrated and per license **you can create an unlimited number of missions**, no limits
- Cost reductions by using ISQM-Manager and MISSIONS-Manager together
- MISSIONS-Manager is linked with ISQM-manager and becomes an integrated software according to your choice of acquisitions
- We continue to develop to create all the tools and features needed to meet your business and/or ISQM requirements.

MISCELLANEOUS:

If you want to acquire ISQM-Manager or MISSIONS-Manager in 2023, the license costs remain at the price of 2022. As soon as MISSIONS-Manager is officially released (estimated September 2023), there will no longer be the possibility of obtaining months of free licenses. The people who will participate with us in the analysis, the development of the missions to be integrated into Missions-manager will be able to start using and test it from June 2023. The free months only cover the costs of "MISSIONS-MANAGER licenses". Currently, there is no "light license" for MISSIONS-MANAGER, if necessary, it will be possible according to the requests and/or needs of the profession to create a light version as ISQM-Manager, at a reduced cost. The use of Missions-Manager will be in "TEST" mode until its official deployment and any defect will be considered as a "provisional and exceptional character". ESOMUS cannot be held responsible for any defect during this period of "TESTS". ESOMUS will expect your company to let us know the defect, the problem, the bug to be corrected as quickly as possible by the developers.
